In today's retail and hospitality market, POS terminal is no longer just a cold and hard business tool. It is a part of the store decoration, a part of the store image. Each curve and detail of the POS terminal should lighten the overall mood of the store, to lift the shopping experience of customers.

With the true-flat PCAP touch screen supporting 10 points multi-touch, beautifully sculptured slim body, sexily curved base stand, Posiflex XT-5517 fits in well with any elegantly decorated store. And more than just good looks, Posiflex XT-5517 is powerful enough to handle any task imaginable that comes its way.

**Looks**

Slimmer than ever, XT Series is a sharp departure from the traditionally more conservative Posiflex terminal design. Every curves and details are carefully thought out to make XT Series one of the most visually desirable terminals in the market.

**Flexibility**

XT-5517 comes with the selection of two foldable bases, the curvy slim GEN7E Base and the larger but practical GEN8E Base.

The new foldable bases allow XT-5517 to be configured into different configurations. "Flat Folded Mode" to save the shipping package volume. "Low Profile Mode" to allow greater interaction between cashier and the customers; and the traditional "Full Extended Mode". All this can be achieved with a simple pull of the hidden lever. This one terminal/multi-configurations concept provides unmatched flexibility to store owners and system integrators alike.
